

Growing Oregon's Economic Health

ONAMI

WHERE and **WHO** We Are

Oregon Nanoscience and Microtechnologies Institute (ONAMI) started its first commercialization project in 2006 – over a decade ago. ONAMI's science-based startup team and results-focused programs deliver significant outcomes. ONAMI has become a successful investor; leveraging invested funds and achieving financial ROIs (including exits) to further strengthen its mission.

ONAMI won the 2012 SSSI Award for Excellence in Technology-Based Economic Development.

WHAT We've Done

261 JOBS
As of July 2017

25x
Leverage for Oregon's economy

58
Commercialization Projects

37
Companies still in business
Others sold or ceased operations

HOW We Did It

Launch Funding
Very early stage program for those with an idea which has commercial value. The maximum amount is **\$75,000**; used to help refine and/or validate the proof-of-concept and assist in optimal company formation.

Gap Funding
Bridges the “gap” between initial startup and angel or venture capital investments. The maximum amount is **\$250,000**; used to demonstrate the validity of the technology and further evolve the company startup.

Leadership and Interns
ONAMI's has a team of seven successful and seasoned, private-sector executives with **decades of direct startup experience**. ONAMI also funds university interns to provide the needed expertise and labor.
