

Oregon Nanoscience and Microtechnologies Institute (ONAMI)'s Portfolio of Companies are innovation leaders and show significant growth potential. They benefited from ONAMI mentoring as well as funding (\$50,000 to \$250,000) to achieve proof-of-concept or further develop their products and business models.

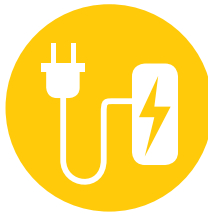

Many of the resulting company products are now in the market or are on their way, making them ripe for investment and partnership opportunities.

They represent the best and brightest in science-based startups in Oregon – entrepreneurs selected because of their companies' high-growth potential.

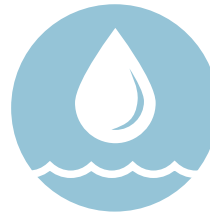

Advanced Materials and Manufacturing

- ABOM
- Agility Robotics
- Amorphyx
- Diatomix
- Inpria
- Liquid Wire
- Microflow CVO
- NANO3D Systems
- Northwest UAV
- Pacific Light Technologies
- Shoei Electronic Materials
- VoxtelNano

Energy

- CSD Nano
- Element 1
- Energy Storage Systems
- Onboard Dynamics
- OnTo Technology
- Perpetua Power Source Technologies
- Polaris Battery Labs

Water

- Crystal Clear Technologies
- Puralytics
- SupraSensor
- ZAPS Technologies

Life Science and Medical Technologies

- AbSci
- Cascade Prodrug
- DesignMedix
- Dune Sciences
- Floragenex
- Home Dialysis Plus
- Lipidomics
- LuxRay Dental Systems
- NemaMetrix
- NeuraMedica
- Northwest Medical Isotopes
- OmnEcoil
- TomegaVax
- Valliscor
